EXPERIENCE

Premier Research — *Contract Wordpress Developer*

PREMIER-RESEARCH.COM
NOVEMBER 2016 - PRESENT

Working with Premier Research's marketing team to integrate Salesforce's Pardot API into the company's Wordpress-based website. Other responsibilities include the design and implementation of small components written in HTML, CSS, and JavaScript, Ninja Forms integration, as well as general Wordpress support and maintenance.

Mineraliety — *Full Stack Developer*

MINERALIETY.COM
NOVEMBER 2014 - APRIL 2017

Developed the entire front and backend of a custom Ruby on Rails marketplace specializing in the sale of minerals, rocks, and gems. Produced creative solutions for a startup on a tight budget, such as a custom newsletter system built around Amazon SES.   Other features of the application include the ability to import product listings from eBay and Etsy and integration of Stripe Connect for payments.

Freelance Web Developer

VARIOUS
JANUARY 2010 - DECEMBER 2016

Worked across numerous platforms, primarily Ruby on Rails and Wordpress, to develop websites for small e-commerce shops, nonprofits, and creative artists. Responsibilities ranged from creating design mockups in Adobe Creative Suite from specifications and the implementation of designs using HTML, CSS, and JavaScript, to the creation and/or management of Content Management Systems, hosting setup, server, and DNS configuration.
